00 · Exam Guide, Versions and Scope (latest: v1.3 — 29 Oct 2026)

> **Primary sources (official):**
> - AWS Certified Cloud Practitioner (CLF-C02) exam guide — `docs.aws.amazon.com/aws-certification/latest/cloud-practitioner-02/` (landing page, 4 domain pages, *Technologies and Concepts*, *In-Scope Services*, *Out-of-Scope Services*, *Revisions*)
> - AWS Skill Builder — Cloud Practitioner (CLF-C02) exam prep
> - AWS Support documentation (support plans)
>
> Everything below was checked against these pages on **30 Oct 2026**. Items I could not verify on an official page are explicitly flagged verify .

1. Which version of the exam guide applies to *you*?

The official **Revisions** page lists four versions of the CLF-C02 guide:

Version	Published
1.0	24 Jun 2026
1.1	28 Aug 2026
1.2	24 Sep 2026
1.3 (latest)	**29 Oct 2026**

AWS states that **guide updates are published about one month before they take effect on the exam**. So:

- Exams taken **now / in the next weeks** are most likely built on the previous guide (≈ v1.2), while
- exams taken **from about late November 2026** follow **v1.3**.

The Revisions page does **not** publish a line-by-line changelog per version — the only itemized change is that **eight services were removed from the out-of-scope list** (Amazon Elastic Transcoder, AWS Elemental MediaStore, Amazon Lookout for Metrics, Amazon Lumberyard, Amazon Monitron, AWS Panorama, AWS RoboMaker, Amazon WorkDocs — i.e., mostly retired services).

How this guide handles versions (so you're safe either way)

- **The text follows v1.3 (latest).**
- Where the **older (2023-era) guide** differs, the item is tagged LEGACY — it is still worth knowing (it can appear if your exam is still built on an older guide, and it is real AWS knowledge), but it is **no longer on the v1.3 scope list**.
- Where AWS **renamed** a service, both names are given (e.g., *QuickSight → Amazon Quick*).

Tag	Meaning
v1.3	Named in the latest official guide
LEGACY	In the older guide, **not listed** (or now explicitly out of scope) in v1.3 — lower priority, learn only the one-liner
NEW	Appears in v1.3 scope (wasn't in the older guide's list)
verify	Not confirmable on an official page — check before the exam

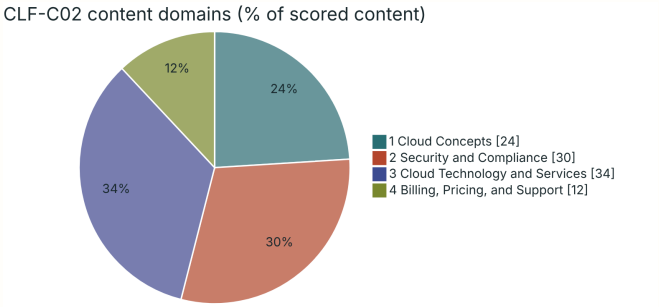

2. Exam facts (official page)

Item	Value
Exam	AWS Certified Cloud Practitioner — **CLF-C02** (Foundational)
Question types	**Multiple choice** (1 correct, 3 distractors) · **Multiple response** (2+ correct out of 5+ options)
Questions	**50 scored + 15 unscored** (= 65; unscored are not identified)
Scoring	Pass/fail · scaled **100–1000** · **minimum passing score = 700**
Scoring model	**Compensatory** — you must pass the *overall* exam, not each section
Guessing	**No penalty**; unanswered = incorrect → always answer
Section feedback	Score report may show per-section classification — interpret with caution (sections have different weights)
Duration	Not stated on the guide page. The exam has historically been **90 minutes [verify on your registration page]**
Candidate	Up to ~6 months of AWS exposure; non-IT backgrounds welcome
Out of scope for the candidate	Coding · designing cloud architecture · troubleshooting · implementation · load and performance testing

The exam validates that you can: explain the value of the AWS Cloud · explain the **shared responsibility model** · understand the **Well-Architected Framework** · understand security best practices · understand AWS **costs, economics and billing** · describe and position **core services** (compute, network, database, storage) · identify the **right service for common use cases**.

> 700/1000 is a *scaled* score — not "70% correct". Aim for 85% or more on practice material to keep a margin.

3. Domains and weights

#	Domain (official name)	Weight	Where in this guide
1	**Cloud Concepts**	24%	File 01
2	**Security and Compliance**	30%	File 02
3	**Cloud Technology and Services**	34%	Files 03a · 03b · 03c
4	**Billing, Pricing, and Support**	12%	File 04

4. Official task statements and skills — v1.3 checklist

Use this as your **tick-list**: you're ready when you can explain every line.

Domain 1 — Cloud Concepts (24%)

- **1.1 Define the benefits of the AWS Cloud** — benefits of global infrastructure (speed of deployment, global reach) · advantages of **high availability, elasticity, agility**.
- **1.2 Identify design principles of the AWS Cloud** — the **Well-Architected Framework** pillars (operational excellence, security, reliability, performance efficiency, cost optimization, sustainability) · differences between pillars.
- **1.3 Understand the benefits of and strategies for migration** — **AWS CAF** (reduced business risk, improved **ESG** performance, increased revenue, increased operational efficiency) · appropriate **migration strategies** (e.g., database replication) · resources supporting the migration journey.
- **1.4 Understand concepts of cloud economics** — **fixed vs variable costs** · costs of on-premises environments · **licensing strategies** (BYOL vs license-included) · **rightsizing** · benefits of **automation** · **economies of scale**.

Domain 2 — Security and Compliance (30%)

- **2.1 Shared responsibility model** — components · customer responsibilities · AWS responsibilities · shared responsibilities · how responsibilities **shift by service** (RDS, Lambda, EC2).
- **2.2 Security, governance, compliance concepts** — where to find compliance info (**AWS Artifact**) · compliance needs by geography/industry (**AWS Compliance**) · how customers secure resources (**Inspector, Security Hub, GuardDuty, Shield**) · **encryption** options (in transit / at rest) · governance services (**CloudWatch** monitoring; **CloudTrail** and **Config** auditing; access reports) · compliance requirements vary among services · where to capture/locate **security logs**.
- **2.3 Access management** — **IAM** · protecting the **root user** · **least privilege** · **IAM Identity Center** · access keys, password policies, **credential storage (Secrets Manager, Systems Manager)** · authentication methods (**MFA**, Identity Center, **cross-account roles**) · groups, users, custom and managed policies · **tasks only root can do** · root protection methods · identity types (e.g., **federated**).
- **2.4 Components and resources for security** — security features/services (**WAF, Firewall Manager, Shield, GuardDuty**) · **third-party security products on AWS Marketplace** · where security info lives (**Knowledge Center, Security Center, Security Blog**) · **Trusted Advisor** to identify security issues.

Domain 3 — Cloud Technology and Services (34%)

- **3.1 Deploying and operating** — decide between **programmatic access (APIs, SDKs, CLI)**, **Management Console**, and **IaC** · one-time operations vs **repeatable processes** · deployment models (**cloud, hybrid, on-premises**).

- **3.2 Global infrastructure** — **Regions, AZs, edge locations** and their relationships · **high availability with multiple AZs** · AZs share no single point of failure · when to use **multiple Regions** (DR, business continuity, low latency, **data sovereignty**) · benefits of edge locations.
- **3.3 Compute** — **EC2 instance types** (compute optimized, storage optimized…) · containers (**ECS, EKS**) · serverless (**Fargate, Lambda**) · **auto scaling provides elasticity** · purpose of **load balancers**.
- **3.4 Databases** — **EC2-hosted vs managed** databases · relational (**RDS, Aurora**) · NoSQL (**DynamoDB**) · memory-based (**ElastiCache**) · migration tools (**DMS, SCT**).
- **3.5 Network** — **VPC components** (subnets, gateways) · VPC security (**network ACLs, security groups, Amazon Inspector**) · **Route 53** · connectivity options (**VPN, Direct Connect**).
- **3.6 Storage** — **object storage** uses · **S3 storage classes** · block (**EBS, instance store**) · file (**EFS, FSx**) · cached file systems (**Storage Gateway**) · **lifecycle policies** · **AWS Backup**.
- **3.7 AI/ML and analytics** — what services do (e.g., **SageMaker AI, Lex**) · analytics (**Athena, Kinesis, Glue, Amazon Quick**).
- **3.8 Other categories** — integration (**EventBridge, SNS, SQS**) · business apps (**Connect, SES**) · customer enablement (**AWS Support**) · developer tools (**CodeBuild, CodePipeline, X-Ray**) · end-user computing (**AppStream 2.0, WorkSpaces, WorkSpaces Secure Browser**) · frontend/mobile (**Amplify**) · IoT (**IoT Core**).

Domain 4 — Billing, Pricing, and Support (12%)

- **4.1 Pricing models** — compute purchasing options (**On-Demand, Reserved, Spot, Savings Plans, Dedicated Hosts, Dedicated Instances, Capacity Reservations**) · **Reserved Instance flexibility** and behavior in **AWS Organizations** · **data transfer** costs (in/out, cross-Region, same Region) · storage options and tiers.
- **4.2 Billing, budget, cost management** — **Budgets, Cost Explorer** · **Pricing Calculator** · **Organizations consolidated billing** and cost allocation · **cost allocation tags** and **Cost and Usage Report**.
- **4.3 Technical resources and Support options** — official docs/whitepapers/blogs · **Prescriptive Guidance, Knowledge Center, re:Post** · **Support plans (v1.3 names): Basic Support, Business Support+, Enterprise Support, Unified Operations** (+ customer service and communities) · **Trusted Advisor, Health Dashboard, Health API** · **Trust and Safety** (report abuse) · **AWS Partners** (Marketplace, ISVs, system integrators) and partner benefits · key Marketplace capabilities (cost management, governance, entitlement) · **Professional Services, Solutions Architects**.

5. Service scope map

In scope — v1.3 official list (non-exhaustive, subject to change)

Category	Services
Analytics	Athena · EMR · Glue · Kinesis · OpenSearch Service · **Amazon Quick** (NEW name; formerly QuickSight) · Redshift
Application Integration	EventBridge · SNS · SQS · Step Functions
Business Applications	Connect · SES
Cloud Financial Management	Budgets · Cost and Usage Reports · Cost Explorer · Marketplace
Compute	Batch · EC2 · Elastic Beanstalk · Lightsail · Outposts
Containers	ECR · ECS · EKS
Customer Enablement	AWS Support
Database	Aurora · **DocumentDB** · DynamoDB · ElastiCache · Neptune · RDS
Developer Tools	AWS CLI · CodeBuild · CodePipeline · X-Ray
End User Computing	AppStream 2.0 · WorkSpaces · **WorkSpaces Secure Browser** (formerly WorkSpaces Web)
Frontend Web & Mobile	Amplify
IoT	IoT Core
Machine Learning	Comprehend · Lex · Polly · **Amazon Q** · Rekognition · **SageMaker AI** (NEW name) · Textract · Transcribe · Translate
Management & Governance	Auto Scaling · CloudFormation · CloudTrail · CloudWatch · Compute Optimizer · Config · Control Tower · Health Dashboard · License Manager · Management Console · Organizations · Service Catalog · **Service Quotas** · Systems Manager · Trusted Advisor · Well-Architected Tool
Migration & Transfer	Application Discovery Service · Application Migration Service · DMS · **Migration Evaluator** · Migration Hub · SCT
Networking & Content Delivery	API Gateway · CloudFront · Direct Connect · Global Accelerator · **PrivateLink** · Route 53 · **Transit Gateway** · VPC · VPN · **Site-to-Site VPN** · **Client VPN**
Security, Identity, Compliance	Artifact · ACM · CloudHSM · Cognito · Detective · Directory Service · Firewall Manager · GuardDuty · IAM · IAM Identity Center · Inspector · KMS · Macie · RAM · Secrets Manager · Security Hub · Shield · WAF
Serverless	Fargate · Lambda
Storage	Backup · EBS · EFS · Elastic Disaster Recovery · FSx · S3 · S3 Glacier · Storage Gateway

Explicitly out of scope — v1.3 official list

Amazon AppFlow · AWS Clean Rooms · **AWS Data Exchange** · Amazon DataZone · **Amazon MSK** · AWS AppFabric · Amazon SWF · AWS Copilot · **AWS Wavelength** · Application Cost Profiler · Amazon DevPay · **AWS Activate** · **AWS IQ** · **AWS Managed Services (AMS)** · **AWS Billing Conductor** · Amazon Keyspaces · **Amazon MemoryDB** · **AWS AppConfig** · AWS Application Composer · **CodeArtifact** · **CodeDeploy** · CodeGuru · **CloudShell** · **Device Farm** · GameLift · IoT Device Defender · **IoT Greengrass** · Fraud Detector · Personalize · AWS Chatbot · Data Lifecycle Manager · **Launch Wizard** · AWS Elemental (MediaConnect/Convert/Live/Package/Tailor, appliances) · Amazon IVS · Migration Hub Refactor Spaces · **AWS Transfer Family** · Cloud Map · Network Access Analyzer · Ground Station · VPC Lattice · Cloud Directory · **AWS Network Firewall** · **FSx for Lustre**.

LEGACY — in the older guide's lists, not listed in v1.3 (low priority — learn the one-liner only)

AWS **Snow Family** · AWS **Audit Manager** · Amazon **Kendra** · AWS **AppSync** · AWS **CodeCommit / CodeStar / Cloud9** · AWS **Local Zones** · AWS **Resource Groups & Tag Editor** · AWS **DataSync**.

> *Items marked "not listed" are **not** guaranteed absent — AWS says the list is non-exhaustive — but they are clearly **not priority** under v1.3. The services that are **explicitly out of scope** should not take any of your study time beyond recognizing the name.

Technologies and concepts that may appear (official list)

APIs · Benefits of migrating to the AWS Cloud · **AWS CAF** · AWS Compliance · Compute · Cost management · Databases · EC2 instance types/purchasing (Reserved, On-Demand, Spot) · AWS global infrastructure (Regions, AZs) · **Infrastructure as Code** · AWS Knowledge Center · Machine learning · Management and governance · Migration and data transfer · Network services · **AWS Partner Network (APN)** · AWS Prescriptive Guidance · **AWS Pricing Calculator** · AWS Professional Services · AWS re:Post · **AWS SDKs** · Security · AWS Security Blog · **Shared responsibility model** · AWS solutions architects · Storage · AWS Support Center · AWS Support plans · **Well-Architected Framework**.

6. Official preparation resources (AWS Skill Builder)

Skill Builder is a login-gated site, so I could verify only the **names/availability** of these official resources, not their contents:

Official resource	Notes
Exam Prep Standard Course — AWS Certified Cloud Practitioner (CLF-C02)	Official AWS exam-prep course, updated for the current exam; uses your Skill Builder login
Exam Prep Enhanced Course — AWS Certified Cloud Practitioner (CLF-C02)	Enhanced version with practice materials; requires a **Skill Builder subscription**
Official Practice Question Set (CLF-C02)	AWS-written practice questions with explanations (updated)
Official Practice Exam (CLF-C02)	Full-length readiness assessment; requires a **Skill Builder subscription**
Exam Prep Official Pretest	Pretest to assess readiness

> verify Durations, number of questions and prices change — check Skill Builder directly.

Study order that works: read this guide → Skill Builder Standard course (gaps) → **Official Practice Question Set** → **Official Practice Exam** → review mistakes with files 05/06 → exam.

7. Recommended 5-day plan

Day	Focus	Done when
1	Domain 1 + Domain 4	All self-checks correct
2	Domain 2 (30%)	You can draw the shared responsibility model and map every security service
3	Domain 3 — 03a + 03b	"Which service?" table by heart
4	Domain 3 — 03c + glossary	AI/ML, analytics, integration, management tools
5	Practice set + official practice exam + traps list	≥ 85% twice

06 · Glossary and A–Z Service Index

One-line definitions for every service/term likely on CLF-C02 (guide **v1.3**). Use for last-day review.

Scope tags: v1.3 listed in v1.3 · NEW new/renamed in v1.3 · LEGACY (older guide / not listed now) · OUT explicitly out of scope. Untagged = general concept or supporting service.

Concepts

Term	Definition
Region	Geographic area with multiple AZs; independent
Availability Zone (AZ)	One or more data centers in a Region; isolated failure domain
Edge location	Point of presence for CloudFront/Route 53/Global Accelerator
Elasticity	Automatic scale out/in with demand
Scalability	Ability to handle growing load
High availability	Stays up if a component fails (multi-AZ)
Fault tolerance	Keeps running with no interruption on failure
Durability	Data is not lost (S3 = 11 nines)
Agility	Fast provisioning and experimentation
CapEx / OpEx	Upfront capital expense / ongoing operational expense
TCO	Total cost of ownership (all direct + indirect costs)
IaC	Infrastructure as Code (CloudFormation)
Least privilege	Grant only the minimum permissions needed
Shared responsibility	AWS secures **of** the cloud; customer secures **in** the cloud
MFA	Multi-factor authentication
BYOL	Bring your own license
Rightsizing	Match resource size to actual need
Stateful / stateless	Return traffic auto-allowed (SG) / must be explicitly allowed (NACL)
Serverless	You don't manage servers (Lambda, Fargate, DynamoDB, S3)
Managed service	AWS handles patching, backups, HA (RDS, DynamoDB)
Well-Architected pillars	Operational Excellence, Security, Reliability, Performance Efficiency, Cost Optimization, Sustainability
CAF perspectives	Business, People, Governance, Platform, Security, Operations
7 Rs	Retire, Retain, Rehost, Relocate, Repurchase, Replatform, Refactor

A–Z services

Service	One-liner	Domain/Category
Amazon API Gateway	Create/publish/secure APIs	Networking / Integration
AWS Activate OUT	Startup credits & support	Customer engagement
Amazon Aurora	High-performance MySQL/PostgreSQL-compatible relational DB	Database
AWS Amplify	Build/host full-stack web & mobile apps	Frontend/mobile
AWS AppConfig OUT	Deploy app configuration / feature flags	Developer tools
AWS AppSync	Managed GraphQL API	Frontend/mobile
Amazon AppStream 2.0	Stream desktop apps to browsers	End-user computing
Amazon Athena	SQL queries on S3 (serverless)	Analytics
AWS Artifact	Compliance reports & agreements	Security
AWS Audit Manager	Continuously collect audit evidence	Security/Governance
AWS Auto Scaling / EC2 Auto Scaling	Automatic capacity adjustment	Compute/Management
AWS Backup	Centralized backup	Storage
AWS Batch	Batch computing at scale	Compute
AWS Billing Conductor OUT	Custom billing/pricing views	Cost mgmt
AWS Budgets	Cost/usage alerts	Cost mgmt
AWS Certificate Manager (ACM)	Manage SSL/TLS certificates	Security
AWS Cloud9	Cloud IDE	Developer tools
AWS Cloud Adoption Framework (CAF)	Cloud transformation guidance	Migration
AWS CloudFormation	IaC templates/stacks	Management
Amazon CloudFront	CDN	Networking
AWS CloudHSM	Dedicated hardware security module	Security
AWS CloudShell OUT	Browser-based CLI shell	Developer tools
AWS CloudTrail	API call audit log (who/what/when)	Management/Security
Amazon CloudWatch	Metrics, logs, alarms, dashboards	Management
AWS CodeBuild v1.3 · **CodePipeline** v1.3 · CodeArtifact OUT · CodeDeploy OUT · CodeCommit LEGACY · CodeStar LEGACY	Build / CI-CD pipeline / artifacts / deploy / Git repos / toolchain	Developer tools
Amazon Cognito	Sign-up/sign-in for app customers	Security

Service	One-liner	Domain/Category
Amazon Comprehend	NLP: sentiment, entities	AI/ML
AWS Compute Optimizer	ML rightsizing recommendations	Management
AWS Config	Resource config history + compliance rules	Management
Amazon Connect	Cloud contact center	Business apps
AWS Control Tower	Multi-account landing zone governance	Management
AWS Cost and Usage Report (CUR)	Most detailed cost data in S3	Cost mgmt
AWS Cost Explorer	Analyze/forecast costs	Cost mgmt
AWS Data Exchange OUT	Third-party datasets	Analytics
AWS DataSync	Online data transfer to AWS storage	Migration
AWS Database Migration Service (DMS)	Migrate databases with minimal downtime	Migration/DB
Amazon Detective	Investigate security findings	Security
AWS Direct Connect	Dedicated private connection to AWS	Networking
AWS Directory Service	Managed Microsoft Active Directory	Security
Amazon DynamoDB	Serverless NoSQL key-value DB	Database
Amazon EBS	Block storage for EC2	Storage
Amazon EC2	Virtual servers	Compute
Amazon ECR	Container image registry	Containers
Amazon ECS	AWS container orchestration	Containers
Amazon EFS	Shared elastic file system (Linux/NFS)	Storage
AWS Elastic Beanstalk	Deploy apps; AWS manages infra	Compute
AWS Elastic Disaster Recovery	Recover servers after disaster	Storage/DR
Elastic Load Balancing (ELB)	Distribute traffic (ALB/NLB/GWLB)	Compute/Networking
Amazon ElastiCache	In-memory cache (Redis/Memcached)	Database
Amazon EKS	Managed Kubernetes	Containers
Amazon EMR	Managed Hadoop/Spark	Analytics
Amazon EventBridge	Serverless event bus	Integration
AWS Fargate	Serverless compute for containers	Serverless
AWS Firewall Manager	Central firewall rule management across accounts	Security
Amazon FSx	Managed Windows/Lustre/NetApp/OpenZFS file systems	Storage
AWS Global Accelerator	Static anycast IPs over AWS backbone	Networking
AWS Glue	Serverless ETL + Data Catalog	Analytics
Amazon GuardDuty	Intelligent threat detection	Security
AWS Health Dashboard	Service & account health events	Management/Support
AWS IAM	Users, groups, roles, policies	Security
AWS IAM Identity Center	Workforce SSO	Security
Amazon Inspector	Automated vulnerability scanning	Security
AWS IoT Core v1.3 · Greengrass OUT	Connect devices / local edge IoT	IoT
AWS IQ OUT	Hire AWS-certified experts	Customer engagement
Amazon Kendra	ML enterprise search	AI/ML
AWS KMS	Managed encryption keys	Security
Amazon Kinesis	Real-time streaming data	Analytics
AWS Lambda	Serverless functions	Compute
Amazon Lex	Chatbots (conversational)	AI/ML
AWS License Manager	Track software licenses	Management
Amazon Lightsail	Simple VPS with predictable pricing	Compute
AWS Local Zones	Compute near population centers	Global infra
Amazon Macie	Discover sensitive data in S3	Security
AWS Managed Services (AMS) OUT	AWS operates your infra	Customer engagement
AWS Marketplace	Buy third-party software	Cost/Partners
Amazon MemoryDB OUT	Durable in-memory Redis-compatible DB	Database
AWS Migration Hub	Track migrations	Migration
Amazon MSK OUT	Managed Kafka	Analytics
Amazon Neptune	Graph database	Database
AWS Network Firewall OUT	Managed VPC firewall	Security
AWS Organizations	Multi-account mgmt + consolidated billing + SCPs	Management

Service	One-liner	Domain/Category
AWS Outposts	AWS infra in your data center	Compute/Hybrid
Amazon OpenSearch Service	Search & log analytics	Analytics
Amazon Polly	Text-to-speech	AI/ML
AWS Pricing Calculator	Estimate costs	Cost mgmt
Amazon Quick NEW (formerly QuickSight)	BI dashboards	Analytics v1.3
AWS RAM	Share resources across accounts	Security
Amazon RDS	Managed relational DB	Database
Amazon Redshift	Data warehouse	Database/Analytics
Amazon Rekognition	Image/video analysis	AI/ML
Amazon Route 53	DNS + health checks	Networking
Amazon S3 / S3 Glacier	Object storage / archive classes	Storage
Amazon SageMaker AI NEW (formerly SageMaker)	Build/train/deploy ML models	AI/ML v1.3
AWS Schema Conversion Tool (SCT)	Convert DB schema	Migration
AWS Secrets Manager	Store/rotate secrets	Security
AWS Security Hub	Aggregate security findings	Security
AWS Service Catalog	Approved product catalog	Management
Amazon SES	Bulk/transactional email	Business apps
AWS Shield	DDoS protection (Standard free / Advanced paid)	Security
AWS Snow Family	Physical devices for data transfer/edge	Migration
Amazon SNS	Pub/sub notifications	Integration
Amazon SQS	Message queue	Integration
AWS Step Functions	Workflow orchestration	Integration
AWS Storage Gateway	Hybrid cloud storage	Storage
AWS Systems Manager	Operate/patch/manage fleets	Management
Amazon Textract	Extract text/forms from documents	AI/ML
Amazon Transcribe	Speech-to-text	AI/ML
AWS Transfer Family OUT	SFTP/FTPS into S3/EFS	Migration
Amazon Translate	Language translation	AI/ML
AWS Trusted Advisor	Best-practice checks	Management/Support
Amazon VPC	Isolated virtual network	Networking
AWS VPN	Encrypted tunnel to AWS	Networking
AWS WAF	Web application firewall (L7)	Security
AWS Wavelength OUT	AWS at 5G network edge	Global infra
AWS Well-Architected Tool	Review workloads vs pillars	Management
Amazon WorkSpaces v1.3 · **WorkSpaces Secure Browser** NEW (formerly WorkSpaces Web)	Virtual desktops / secure browser access	End-user computing
AWS X-Ray	Distributed tracing	Developer tools
Amazon DocumentDB v1.3	MongoDB-compatible document database	Database
Amazon Q v1.3	Generative-AI assistant	AI/ML
AWS PrivateLink NEW	Private connectivity to services (no public internet)	Networking
AWS Transit Gateway NEW	Hub connecting many VPCs and on-prem networks	Networking
AWS Site-to-Site VPN / Client VPN NEW	VPN for sites / individual users	Networking
AWS Service Quotas NEW	View/manage service limits	Management
AWS Migration Evaluator NEW	Build migration business case / TCO	Migration
AWS Business Support+ NEW	Minimum recommended plan for production; 24/7; < 1 h prod down; < 30 min critical	Support
AWS Enterprise Support NEW	Designated TAM; < 15 min critical; Security Incident Response included	Support
AWS Unified Operations NEW	Mission-critical; < 5 min critical; continuous resiliency reviews	Support
